Hi, I'm an expert Ruby and Rails developer. I love what I do and excited to keep discovering new knowledge and possibilities. I consistently experiment with new ideas in a side projects to learn. With extensive experience in front-end, back-end, team and product management, I enjoy leading teams that deliver valuable products. I'm a big believer in efficient and nimble companies. Life is too short for mediocre achievements.

WORK & EDUCATION

Practice Ignition
Lead developer

Airtasker
Staff software engineer

Split Payments
Lead developer

Car Next Door
Rails developer

Ride Next Door
CTO, Rails & mobile developer

OpenSight
CTO, Rails developer

Appointuit
Rails developer

Client Heartbeat
Rails developer

Oddsense
Rails developer

Everyday Hero
Rails developer

Technology One
.NET developer

Olitek
.NET developer

Antipodes Eco-tours
Final year project

The University of Queensland
Software design

IES Foundation Year
Undergraduate prep

Timeline

2022, 2021, 2020, 2019, 2018, 2017, 2016, 2015, 2014, 2013, 2012, 2011, 2010, 2009, 2008, 2007, 2006

SIDE PROJECTS

Tribes Club
Meetup service

Ruby Burgers
Meetup

active_interaction-extras
Ruby gem

pagelet_rails
Ruby gem

Ruby Australia committee
General member

Web-airplay
Airplay Mac app

Storyline
News visualisation tool

VentureBakers
Incubators repository

TopicRay
Collaboration tool

TwinMaze
Movie recommendation service

Dota-wow
Game emulator

Joomla webiste

WORK

Practice Ignition
Sep 2021-Now Lead a platform team to strengthen authentication and introduce token authentication. Started a documentation guild to help the organisation scale as the team grows. Hosted multiple social gatherings to improve remote and social culture.
rails 6, heroku, aws, confluence, jira, graphql

Airtasker
Jun 2021-Sep 2021 During my time I shipped Tasker Listing feature on landing pages with A/B test. I decided to leave after 3 months as it wasn't a good fit for me.
react, typescript, aws, rails, jira

Split Payments
Jun 2018-May 2021 Carrying out multiple roles: team lead, tech lead, lead developer, product manager. Helped to grow team from 3 to 12 in 6 months. Shaped many internal processes and team's culture. All while delivering new features and major refactoring.
event sourcing, rails 5, stimulus.js, webpack, aws, blue-green deployments, 100% test coverage

Car Next Door
Nov 2016-Jun 2018 Wide range of experience: introduced new architecture, wrote a workflow system, reduced test time from 14 to 4 minutes, built an API, added an analytics platform and optimised company processes.
rails 4,5 and others

Ride Next Door
Nov 2016-Mar 2017 A sole developer for the startup of on-demand shuttle bus in Sydney. From idea to launch in three months. Built mobile app, back-end and front-end.
rails 5, web sockets, ionic

Opensight
Dec 2013-Nov 2016 Opensight is a joint venture where I performed the CTO role. I was responsible for the system architecture, team management, software, business and product development.
rails 4, ember.js, redis, elasticsearch, postgres, mongodb, hybrid mobile apps, ionic, aws,

Appointuit
Dec 2012-Dec 2013 Worked in a small medical startup in Brisbane. I was responsible for maintenance and enhancements of the web application.

EDUCATION

Bachelor of Information Technology, Software design
The University of Queensland
2007-2010
Average GPA 5.9
Awards:
- Dec 2007 Dean's Commendation for High Achievement
- Jul 2007 Dean's Commendation for High Achievement
- Jun 2010 Best Group Project (Advanced IT project 2010)
- Jul 2010 Dean's Commendation for High Achievement

SIDE PROJECTS

Tribes Club
Feb 2019-Now Tribes Club is a service for managing online communities and facilitating meetings based on governing principles.

Ruby Burgers
Nov 2019 - Feb 2020 Ruby meetup with an attempt at philosophical discussion around what makes good code. Stopped due to Coronavirus.

active_interaction-extras gem
Jul 2016 - Jun 2019 Extensions to active_interaction gem.

pagelet_rails gem
Jun 2016-Jun 2018 The gem addresses the increasing complexity of big Rails applications. It introduces new architecture which brings a lot of flexibility to the front-end implementation and improves performance.
rails internals, perceived performance, turbolinks, content streaming, ssi

Ruby Australia
Dec 2016-Dec 2017 During my term, as a committee member, I consolidated all documentation, launched RubyDownUnder forum, participated in the website redesign and introduced name tags to all ruby meet-ups in Australia.

Web-airplay app
Feb 2015-Dec 2015 Web application packaged as a Mac app to send online video to airplay compatible devices like AppleTV.
traveling ruby, cuba, sinatra, rails 4, vagrant

StoryLine
Sep 2012-Jun 2014 In the world with the increasing number of news and blogs, it's important to filter out the noise. Storyline offers a new way to browse and discover new information on the web.
d3.js, ember.js, rails 3, jQuery

TopicRay.com
Aug 2011-Jun 2014 TopicRay is an online discussion and collaboration tool, which provides ability to have multi-threaded conversation in real-time.
rails 3, heroku, D3.js, backbone.js, ocanvas, websockets, jQuery

VentureBakers
Jun 2012-Oct 2012 Startup to centralise information for startups in Australia.
rails 3, cancan, dragonfly, slim
